

"YOUR SURFACE IS ONLY GOING TO BE AS GOOD AS THE WAY YOU CAN MAINTAIN IT."

PETER MACDONALD · ARENA SURFACES NEW ZEALAND

REDBACK PREMIUM ARENA GROOMER

How Arena Surfaces keeps client arenas in peak riding condition.

Arena Surfaces does everything to do with horse arenas. Peter has used all four common arena groomers in New Zealand. Today his team uses the Redback Premium Arena Groomer on nearly every client arena.

LOCATION	IN USE	SURFACES	SETUP
Whanganui, NZ	**12 months, nearly every client arena**	**Fibre, sand, sand & rubber**	**PAG + optional equaliser bar**

THE CHALLENGE

Peter started out grooming with a machine he built himself. It did the job, but it wasn't something clients could buy. He needed a proven groomer he could demonstrate on site, readily available on the New Zealand market.

THE SOLUTION

Arena Surfaces talked to Redback in the Manawatu and put a Premium Arena Groomer to work. Now any client can be sent Redback's way for a machine that does what their arena needs.

> **"BY FAR FOR US, THE REDBACK MACHINE WAS THE ONE THAT WE FIND MOST VERSATILE."**
>
> "It's been the best thing that we've done for our business."
>
> **PETER MACDONALD**

Why it works

One machine for every surface

Fibre (three types), sand, and sand and rubber. "This machine can handle all of those different surfaces."

GROOMS THEM ALL.

Long conditioning tines

Agricultural spring steel that really works the surface. "There's no chance that these tines would end up digging into your base material."

PROTECTS YOUR BASE.

Optional equaliser bar

Used a lot on competition arenas. "It equalises the surface out or levels it out perfectly flat."

COMPETITION-READY FINISH.

Roller packer

"That actually firms the surface back down and leaves a nice, ready-to-ride surface."

READY TO RIDE.

Farm-tough build. "It's strong, it's sturdy. These tines are agricultural spring steel. They're really, really strong."

BUILT TO LAST.

PROTECT YOUR ARENA INVESTMENT

There's a lot of money in a surface. Look after it properly.

Peter sees it often: owners invest heavily in getting the right surface for their horses, then maintain it with whatever is lying around.

> **"TOWING THE OLD GATE ROUND, TOWING A PALLET ROUND, SOMETHING LIKE A PAG FROM REDBACK WILL JUST KEEP YOUR ARENA IN PEAK RIDING CONDITION ALL OF THE TIME."**
>
> "Investing in a machine that's purpose-built to groom and condition the arena surface is exactly what you need to do."

BACKED BY REDBACK

"Our experience with the Redback team here in the Manawatu has been outstanding. They're always at the end of the phone during business hours. They're very knowledgeable, all of the staff."

OVER 30 YEARS. THOUSANDS OF CUSTOMERS.

Real people, real support.
